Underwriting requirements

Get your case off  
to a great start

As we begin underwriting your case, we want to keep things simple wherever possible, so you can focus on your client's needs. One way we do that is by offering you this underwriting requirements guide, which includes the key information you're likely to need.

Another way we keep things simple is by asking you to call your underwriter directly. Just go straight to the source with your questions. We know most companies won't let you do that. But it works, so we use it. And we hope you will, too.

# Nationwide® Intelligent Underwriting

Nationwide® Intelligent Underwriting streamlines the life insurance application process for both you and your clients. It can provide a faster and more efficient underwriting process with:

- Faster time to an underwriting decision
- Fewer attending physician statements and less need for additional underwriting requirements
- Accelerated process for some of the healthiest clients by eliminating exams and labwork<sup>1</sup>
- Less time spent on application paperwork, thereby reducing your time spent gathering your clients' medical history

## How does it work?

## Completing the tele-interview

**Option 1:** After completing the electronic application, please have your client call the phone number provided on the Medical Tele-Interview screen in iPipeline to complete the interview right away.

**Option 2:** While completing the electronic application, select the option to “Schedule interview now” and follow the prompts to electronically select a date and time window to complete the interview.

The interview will be recorded, and the client signs via electronic voice signature. Relatively healthy clients can expect an average interview time of 25 minutes, but time may vary significantly depending on client health and ability to provide detailed information on medical history.

Nationwide will notify you regarding additional underwriting requirements within 48 hours of completion of the tele-interview.

During the medical visit, the examiner will collect:

- Height, weight, blood pressure and pulse information
- Urine and blood samples

<sup>1</sup> U.S. citizens and permanent residents (10-year green card status) ages 18 - 60 applying for face amounts \$100,000 - \$1 million are eligible for possible acceleration for Preferred or better rate classes.

## Setting eligibility expectations

For some of the healthiest clients, an underwriting decision will be made without the need for additional underwriting requirements.

Some of the healthiest clients will **not** be accelerated simply because we don't have enough information to make a decision. Therefore, additional underwriting requirements will be needed to reach an underwriting decision. Preferred and Preferred Plus underwriting classifications are still available, even if clients are not eligible for acceleration.

For example, we may ask the applicant to fill out IRS Form 4506-T: Request for Transcript of Tax Return or provide copies of financial statements that validate assets and/or net worth so that we can verify the income stated on the life application. The applicant completes a one-page authorization form during the application process. Our underwriting department submits it to the IRS, and we receive the transcript within about 48 hours.

# Financial underwriting requirements

## Income replacement

As you help your clients select the life insurance that meets their needs, you may have questions about typical coverage amounts. Use our guidelines for some common life insurance scenarios to help answer them. Please keep in mind, though, that we may consider your clients for amounts outside these guidelines on an individual basis. Also, remember that we reserve the right to adjust these guidelines at any time.

Age	Multiply annual earned income by:
20 - 30	30x
31 - 40	25x
41 - 50	20x
51 - 60	15x
61 - 70	10x
71+	5x

## Estate protection

We base coverage levels for estate protection on applicable state and federal estate and inheritance taxes. At rates of 55% and higher, you may calculate the amount of insurance necessary using reasonable estate growth projections:

- Time horizons of up to 15 years (or your client's life expectancy if it's less)
- Current interest rates of up to 6%

Keep in mind, however, that you should value all estate assets on a current or near-current basis for older clients.

## Juvenile

For individual juvenile coverage, ages 15 days through 17 years, the maximum amount of coverage may not exceed the amount of life coverage in force on the parent or legal guardian up to a maximum of \$1 million<sup>6</sup> for all states except Washington and New York. Washington and New York laws limit the amount of coverage on juveniles as follows:

### Washington state:

- The life coverage may not exceed the household income

### New York state:

- Ages under 4½ years — The maximum life coverage may not exceed the greater of \$50,000 or 25% of the amount of insurance in force on the parent/owner
- Ages 4½ years to 17 years — The maximum life coverage may not exceed the greater of \$50,000 or 50% of the amount in force on the parent/owner

The owner of the policy must be a parent, legal guardian, grandparent or noncustodial parent. Parents or guardians who have legal custody must complete and sign the application.<sup>7</sup>

## Key person

For key person protection, the maximum amount of coverage is typically five to 10 times the individual's annual salary. We may consider a higher amount if you attach a full explanation of the need. Additional information you may want to include is the business's net worth, the proposed insured's monetary contribution to the business and the in-force coverage on other key personnel.

## Buy/sell agreements

Important partners or shareholders should be insured based on their relative worth to the business. Of course, the overall value for all insureds must be realistic in relation to their respective roles and percentage of ownership of the business. We'll base the amount of insurance coverage on the reasonable appraised value of the business and the proposed insured's share of it. Typically, the amount of coverage for operating entities is up to 10 times the net income amount.

<sup>6</sup> Amounts over \$1 million in all states except Washington and New York will be considered on an individual basis.

<sup>7</sup> If the face amount is \$25,000 or less and the grandparent has custody of the child, the signature of the parent is not required.

## Factors and conditions

We consider the following conditions and factors when evaluating each proposed insured. As you review this list, remember that it's just a quick reference and does not include everything that could affect our final underwriting decision. Also, some rated classifications may qualify for the Placement Improvement Program (depending on the product) so please contact your underwriter for more details.

## Marijuana use

Recreational marijuana users may qualify for Nontobacco Standard or Tobacco Preferred depending on age of the client and frequency of use (regardless of method of delivery):

- Clients 41 or older who use marijuana on a recreational basis of five times or fewer a month may qualify for Nontobacco Standard
- Clients ages 19 and older who use marijuana up to four times a week may qualify for Tobacco Preferred

Subject to the following restrictions:

- The marijuana use must be disclosed on the application
- There can be no alcohol or other drug abuse history
- There can be no current use of other drugs of abuse, including controlled substances prescribed by a physician
- There can be no complications related to marijuana use
- There can be no current medical or psychiatric disorders
- There can be no criminal history or significant motor vehicle violations
- The client must have a stable environment, lifestyle and occupation

Medical marijuana may be considered depending on the underlying impairment.

# Celebratory cigar program

Some clients are going to celebrate with a cigar every once in a while. We understand that, and we don't think it should keep them from qualifying for Nontobacco Preferred Plus or Nontobacco Preferred rates if they're otherwise healthy and qualify.

## Occasional cigar smokers can still qualify for Nontobacco Preferred Plus or Nontobacco Preferred rates if:

- They don't smoke more than one cigar a month or 12 cigars a year for Nontobacco Preferred Plus, or more than one cigar a week or five cigars a month for Nontobacco Preferred
- They disclose their cigar use on the application
- They test negative for tobacco use

Please note that these guidelines apply to cigar use only. No other form of tobacco use is eligible.

# Wellness credits

For your customers who maintain a healthy lifestyle, our wellness credits could result in a better underwriting classification and price for their life insurance. Here's how the program works:

- We automatically review all cases to see if they're eligible for wellness credits; when one meets the criteria listed below, we automatically apply the credits — there are no forms to submit
- An insured may be credited up to one classification, including from Preferred to Preferred Plus, and wellness credits can improve substandard ratings

Wellness credits are available for insureds with favorable:		
Build/BMI	Blood pressure readings	Routine physical and wellness exams
Stress test/exercise capacity	Family history	Lab results

## The wellness credit program is open to:

- All ages
- All face amounts
- All products except Nationwide YourLife Simplified and Nationwide YourLife CareMatters

## The wellness credit program has the following restrictions:

- It's not available for insureds with known or suspected cardiovascular disease, chronic obstructive pulmonary disease, coronary artery disease, peripheral arterial/vascular disease, cerebrovascular disease, renal disease, diabetes mellitus, connective tissue disorders, progressive muscular disorders or progressive neurological disorders
- It's not applicable for alcohol or drug risks
- No credits may be applied against permanent or temporary flat extras
- It's not available for avocation, criminal, foreign national or driving risks
- It's not available on the Long-Term Care Rider II, Waiver Rider or Accidental Death Benefit Rider
- Cases already using Nationwide's Placement Improvement Program are not eligible for wellness credits

# Term + Perm program

## What sets Term + Perm apart?

### A streamlined life insurance buying process

The Term + Perm program allows clients with an eligible term policy to buy a new permanent life insurance policy from Nationwide without current medical requirements.

### A short list of ineligible companies

# Long-Term Care (LTC) Rider II

**This information does not apply to the Nationwide YourLife CareMatters product.**

Underwriting long-term care coverage differs greatly from general life insurance underwriting and is available only to U.S. citizens and permanent residents (green card holders) who reside in the U.S. and plan to become citizens of the U.S. without prolonged periods of time outside the U.S. This does not include those who hold a conditional permanent resident card issued for fewer than 10 years. Underwriting decisions are based on the medical conditions indicated. If a proposed insured has multiple medical conditions (termed “comorbidities”), the long-term care risk may be compounded, and that risk may be rated or deemed unacceptable. The quality of recovery from an impairment, proper control and level of stability are weighed heavily when determining these risks. The Long-Term Care Rider II is available only on life policies rated Table E or better, and Underwriting reserves the right to ask for additional information at any time.

The Long-Term Care Rider II is not available in all states. In states where it is not yet approved, our original Long-Term Care Rider is available.

## The long-term care underwriting process

### At the time of the original life policy application

1. Submit a long-term care supplemental application along with the life application.
2. Medical requirements for the rider are identical to those listed for the life policy (based upon age and amount).
3. If we need more medical information to evaluate your case, we'll let you know what we need.
4. We conduct routine follow-ups and notify you of any status change.

### After the life policy is in force

1. Submit a supplemental application (available through our website) along with the policy adjustment application.
2. Submit any needed authorizations to obtain medical records.
3. For applicants age 51 and over, we'll require a current paramedical exam and urine specimen if the policy adjustment application and supplemental application are dated six months after the date of the life application or the date of the exam for the life policy. For applicants age 50 and below, we reserve the right to obtain additional medical requirements based on the medical history.
4. Nationwide reserves the right to assess a \$200 processing fee for the application.

### Applicants ages 71 and over

1. Must have been examined by a physician within the past two years prior to the application date.
2. Or, must have a complete physical examination, including lab values, at their own expense.
3. After the exam, must send us the application, and we'll request the medical records.

## Factors that are unique to long-term care underwriting

<b>Cognitive impairment</b>	A deficiency in short- or long-term memory; person, place and time orientation; deductive or abstract reasoning; or safety awareness judgment (other factors include nervous or mental disorders of organic origin, including Alzheimer's or senile dementia, determined by clinical diagnosis or tests)
<b>Functional capacity</b>	The ability to perform activities of daily living (ADLs): <ul style="list-style-type: none"> <li>• Bathing</li> <li>• Dressing</li> <li>• Control of bowel/bladder (continence)</li> <li>• Using the toilet</li> <li>• Transferring out of bed/chair</li> <li>• Eating</li> <li>• Ambulating/mobility (inside and outside)</li> </ul>
<b>Mobility</b>	Osteoporosis, falls and fractures
<b>Multiple medications</b>	The use of multiple medications can cause adverse drug reactions, interactions and prescribing cascade, and may decrease quality of life, mobility and cognition
<b>Frailty</b>	Relatively minor accidents and illnesses may cause serious disabilities
<b>Comorbids</b>	More significance is attached to multiple medical problems than to each individual problem (e.g., obesity and diabetes are comorbids of heart disease)
<b>Chronological vs. physiological age</b>	The applicant may seem much younger or older than their actual age
<b>Favorable factors in maintaining personal independence</b>	<ul style="list-style-type: none"> <li>• Working, either full or part time</li> <li>• A spouse in good health</li> <li>• Participating in hobbies and outside activities</li> <li>• The current ability to drive</li> <li>• The ability to travel and visit independently</li> <li>• Exercising several times a week</li> <li>• Family member or friend living in the same household</li> </ul>

## Section 8: Additional considerations regarding international underwriting guidelines

- Initial premium should not be collected on individuals traveling outside the U.S. within the next 60 days
- For quoting purposes only; each case will be individually underwritten and assessed
- Country list and/or ratings will change as world conditions change
- Foreign residence should be in a major metropolitan area
- We generally will not offer coverage to individuals residing in, or traveling to, countries or jurisdictions under a current U.S. Department of State travel warning
- Countries, jurisdictions and/or any risks not covered by these guidelines will be considered on an individual basis
- Past travel is not considered
- Additional requirements may be necessary

## Additional guidelines when resident alien does not speak or understand English

Procedure to be used when producers are not multilingual or write an occasional application on a non-English-speaking individual:

An interpreter must assist in the completion of the application. The interpreter must read the application and the supplement questions to proposed insureds and owners in their primary language, record the answers to any questions and review the prospectus and the terms of the temporary insurance agreement with them. An interpreter must also be present at the time of the examination and provide the answers to any questions asked by the examiner, or a bilingual medical examiner may be employed. A bilingual inspector may also have to be used by the inspection company.

Each individual, including the producer, serving as an interpreter must complete a foreign interpreter amendment denoting this process has been completed. The interpreter's signature must be witnessed and submitted with the application and exam. This amendment will be provided to you by the underwriting department. If multiple interpreters are used on a case, then each interpreter must complete the foreign interpreter amendment for the part of the process that they were the interpreter for, and the special amendment should be forwarded to Underwriting with the item that they interpreted.

If an examination is required and a bilingual examiner is not available, an interpreter (note: we will accept a family member as the interpreter) must be present at the time the examination is completed and act as an interpreter. By countersigning and dating the examination form below the examiner's signature, the interpreter is attesting to the fact that the individual understood and answered the medical exam questions. If the exam form is not countersigned by the interpreter, then the foreign interpreter amendment needs to be completed.
